

ePrint Direct Ltd Skyline

Designed and developed by ePrint Direct Ltd

Ideal for in-plant print rooms and commercial facility management companies, Skyline provides an easy, fast and accessible way for users to submit print jobs direct from their desktop PC and an efficient way for the print room to manage production. Skyline is available both as an in-house installation and as a hosted service.

Our in-house installation offers the ability for integration with your internal network infrastructure. The hosted service allows customers to benefit from the service without the need for capital outlay on the software and Server hardware - ideal for those customers looking for a particularly fast implementation.

Solution value proposition

Skyline provides an easy, fast and accessible way for users to submit print jobs direct from their desktop. This accessibility results in a higher volume of print room users and a greater print volume. Skyline also enables print rooms to work more efficiently by ensuring jobs arrive at the print shops as print ready PDFs and with complete instructions.

Solution main benefits

- Increased Print Volume

Despite in-plant print room offering many benefits for their organisations, there is often under utilisation of these great in-house facilities. A challenge for the in-plant print room is to become the easy option for users and to offer a complete solution for all printing needs. Skyline helps generate much greater print volumes by enabling you to provide a "desktop" print service for your users and by making the process of ordering print simple and user friendly.

- Increased Efficiency

In today's business climate print rooms are often under pressure to demonstrate that their services will reduce costs and will provide a better level of response. Skyline addresses a key issue impacting levels of response by ensuring the work arrives at the print room as print ready PDFs with clear instructions. Skyline also enables in-plant print rooms to effectively promote their products and services and offer a portfolio of popular templates and documents at the best possible price.

- Integration Capabilities

Skyline architecture delivers extensive integration capabilities with in-house databases and production devices so you can review, manage, and report on work as needed.

Industries served

Education

The majority of in-plant print rooms in the education sector serve a large number of staff and students across multiple sites. The print rooms are responsible for a diverse array of printing, from single A4 sheets to the Prospectus, and traditionally work is submitted as hardcopy and delivered by hand or via internal mail. Skyline addresses these issues by providing an easy, fast and accessible way to submit print jobs from multiple sites and ensures the work arrives at the print room as print ready PDFs with clear instructions.

Financial Services

Within the financial sector, print rooms often have to effectively align services with their organisation to support business needs and to provide continuous improvements. Skyline is a powerful tool in the drive for greater efficiency and profitability. Skyline's architecture delivers extensive integration capabilities with in-house databases and production devices so you can review, manage, and report on work.

General Office

The general office environment generates large volumes of desktop printing daily. A challenge for the organisation's in-plant print room is to offer a complete solution for all printing needs rather than just 'specialised' printing. Skyline helps access the potential profit for the print room, and savings for the organisation, in on-demand short daily print runs by enabling you to provide a "desktop" print service.

Government

Government organisations are under pressure to offer the most cost efficient services. Skyline enables their in-plant print rooms to offer a portfolio of all the printing services their users could need at the best possible price. Skyline also enables the in-plant print room to effectively promote their products and services, generating increased printing volume and greater efficiency savings.
